CA-1 — ANSWER KEY

Class : V	Max Marks : 30
Subject : Mathematics	Duration : 1 Hour

Syllabus: We the Travellers–I • Fractions • Angles as Turns

General Instructions: All questions are compulsory. Read each question carefully before answering.

Section A — 1 Mark Each

1. Write in figures: Twenty-three thousand two hundred thirty.

Ans: 23,230

2. Round off 73,005 to the nearest hundred.

Ans: 73,000

3. Continue the pattern: 10,794 -> 10,796 -> 10,798 -> ___

Ans: 10,800

4. Which fraction is NOT equivalent to 2/3? (a) 4/6 (b) 6/9 (c) 3/5 (d) 8/12

Ans: (c) 3/5

Section B — 2 Marks Each

5. Interchange two digits of 10,593 to make a number between 11,000 and 15,000.

Ans: Swap the digits 0 and 3: 13,590 (lies between 11,000 and 15,000)

6. Ravi's car has been driven 56,987 km and Sheetal's car 67,543 km. Whose car has been driven more, and by about how much (round the difference to the nearest thousand)?

Ans: Sheetal's car; difference = 67,543-56,987 = 10,556, which rounds to 11,000

7. Arrange in ascending order: ■90,000 ■89,999 ■94,983 ■49,900

Ans: ■49,900 < ■89,999 < ■90,000 < ■94,983

8. Compare 11/14 and 7/20 using 1/2 as a reference.

Ans: 11/14 > 1/2 and 7/20 < 1/2, so 11/14 > 7/20

9. Find the fraction equivalent to 3/4 with denominator 16, then compare it with 5/16.

Ans: 3/4 = 12/16; 12/16 > 5/16

10. Reema takes 2 half turns in the same direction. What single turn is this equal to?

Ans: A full turn

Section C — 3 Marks Each

11. A school has 461 girls and 439 boys going on a trip. If autorickshaws carry 3 people each, how many autorickshaws are needed, and how many seats remain unused?

Ans: Total = 900; 900/3 = 300 autorickshaws; 0 seats unused

12. Take the digits 2 and 9. Form two 2-digit numbers, subtract the smaller from the bigger, and repeat the process with the digits of the result until you reach a 1-digit number. Show all your steps.

Ans: 92-29=63; 63-36=27; 72-27=45; 54-45=9. Final digit = 9

Section D — 4 Marks Each (Word / Application Problems)

13. A book has 200 pages, with about 50 words on each page. (a) Estimate the total number of words in the book. (b) A second edition adds 50 more pages of the same word density. What is the new total word count?

Ans: (a) 200 x 50 = 10,000 words. (b) 250 x 50 = 12,500 words

Section E — 2 Marks Each (From Your Textbook)

14. Rearrange the digits of 10,593 to form the smallest possible 5-digit number.

Ans: 10,359

15. How many notes of Rs 100 are there in Rs 65,342?

Ans: 653
