

Periodic Assessment — CA-1

Class 5 · CBSE / NCERT · 2026-27

Class:	5	Subject:	EVS
Max Marks:	70	Duration:	2 Hr 30 Min
Name:	_____	Roll No:	_____
Date:	_____	Difficulty:	Hard

Syllabus: Units 1-3 — Water: The Essence of Life, Journey of a River, The Mystery of Food, Our School: A Happy Place, Our Vibrant Country, Some Unique Places

SECTION A — Multiple Choice Questions (1 Mark each)

1. Which of the following best explains why sea water cannot be directly used for drinking or irrigation? (1 Mark)

A. It is too cold	B. It contains a high amount of dissolved salt harmful in large quantities
C. It has no water cycle	D. It never evaporates

2. A river system's "catchment area" refers to _____. (1 Mark)

A. the sea it flows into	B. the entire land area from which rain and streams drain into the river
C. a bridge built over the river	D. the delta only

3. Which combination of nutrients would be most useful to recommend to someone recovering from illness and needing to rebuild strength? (1 Mark)

A. Only sugar and fried food	B. Proteins along with vitamins and minerals
C. Only carbonated drinks	D. Only spices

4. Food poisoning most commonly occurs due to _____. (1 Mark)

A. eating fresh fruit	B. consuming contaminated or improperly stored food
C. drinking boiled water	D. eating a balanced diet

5. A school council or student committee mainly helps a school function well by _____. (1 Mark)

A. increasing homework	B. giving students a voice in decisions and encouraging responsibility
C. reducing the number of classes	D. replacing teachers

6. The phrase "unity in diversity" is best challenged (tested) when _____. (1 Mark)

A. people celebrate each other's festivals	B. people from different communities refuse to cooperate or respect each other
C. different languages are spoken in different states	D. India has many geographic regions

7. UNESCO World Heritage Sites in India, such as certain forts and temples, are recognised mainly for _____. (1 Mark)

A. being the tallest buildings	B. their outstanding cultural or natural importance to humanity
C. being the newest constructions	D. having the most visitors only

8. Which of these human activities is most directly responsible for a river drying up or shrinking over time? (1 Mark)

A. Planting trees near the riverbank	B. Excessive damming and over-extraction of water for irrigation and industry
C. Allowing natural rainfall to fill it	D. Protecting its catchment forests

9. Which statement best describes why conserving both water and monuments matters for future generations? (1 Mark)

A. Neither will ever run out or get damaged	B. Both are limited resources/heritage that, once lost or destroyed, are very hard or impossible to fully recover
C. Only water needs to be conserved	D. Only monuments need protection

SECTION B — Short Answer Questions (2 Marks each)

1. Explain why desalination (removing salt from sea water) is not yet a common solution to water shortage everywhere. (2 Marks)

2. Why can a river that looks clean at its source become polluted by the time it reaches a big city? (2 Marks)

3. Explain how food habits passed down in a family can affect a child's long-term health. (2 Marks)

4. Discuss briefly why "best before" or expiry dates on packaged food are important to check. (2 Marks)

5. Explain how a school's environment can influence a student's confidence and behaviour outside school. (2 Marks)

6. Why might preserving regional languages be considered as important as having one common national language? (2 Marks)

7. Explain how tourism at a unique place can be both helpful and harmful to that place. (2 Marks)

8. How does the loss of forests along a river's path affect the river's health? (2 Marks)

9. Explain the difference between "food scarcity" and "food wastage" and how both are connected. (2 Marks)

10. Why is it important for a country as large and diverse as India to have a strong sense of national identity? (2 Marks)

11. Explain why heritage sites are sometimes damaged even after being legally protected. (2 Marks)

12. How can the water cycle be affected by climate change, based on what you have learnt? (2 Marks)

13. Explain why students should be involved in keeping their school clean rather than leaving it only to the cleaning staff. (2 Marks)

14. Why might two rivers in different parts of India, such as one in the north and one in the south, look and behave very differently? (2 Marks)

SECTION C — Short Answer Questions (Explain) (3 Marks each)

1. Analyse why water, although covering most of the Earth's surface, is still considered a scarce resource in many parts of the world. (3 Marks)

2. Discuss how human settlements along a river's path can both benefit from and negatively affect the river. (3 Marks)

3. Evaluate why nutritional deficiencies can still occur even in families that regularly eat three meals a day. (3 Marks)

4. Discuss how the values learnt in a school environment (cooperation, discipline, respect for diversity) prepare students to be responsible citizens later in life. (3 Marks)

5. Critically discuss whether preserving every old monument in India is realistic, considering the country's resources and needs. (3 Marks)

6. Explain how a lack of clean water, poor nutrition and unhygienic surroundings can together affect a community's overall health, using the topics you have studied. (3 Marks)

SECTION D — Long Answer / Descriptive Questions (5 Marks each)

1. India has great rivers, unique natural and man-made places, and immense cultural diversity. Discuss how these three aspects together shape India's identity, and explain the responsibility citizens have in protecting them. *(5 Marks)*

2. Explain the full connection between the water cycle, balanced nutrition and human wellbeing, showing how disturbing one part of this system can affect the others. *(5 Marks)*

3. Imagine you are asked to design a short awareness campaign for your school on "protecting our water, food and heritage." Describe three key messages you would include and explain why each is important. *(5 Marks)*
