A. Each thought they were the best ✓

C. They were hungry

B. They lost a game

D. They wanted to go home

9. What helped end the fight between the shapes? (1 Mark)

A. A teacher

C. Rain

B. A star ✓

D. A song

SECTION B — Short Answer Questions (2 Marks each)

1. Why is sharing important, based on the story "Colours"? (0 Marks)

► Sharing lets everyone enjoy more things together, like the children in the story who could make more colourful pictures once they shared their crayons.

2. How did Badal find Moti? (0 Marks)

► While returning from school one evening, Badal saw a puppy shivering in the cold by the roadside and brought it home.

3. Describe the friendship between Badal and Moti in your own words. (0 Marks)

► Badal and Moti became very close friends - they ate together, played together, and Moti followed Badal everywhere, showing true loyalty and love.

4. What did Moti do when Badal did not come home on time? (0 Marks)

► Moti waited at the gate, and when Badal's mother went looking for him, Moti followed his scent, found the pit, and started barking to alert her.

5. What did Circle say to prove it was the best shape? (0 Marks)

► Circle said it was round and beautiful, with no sharp edges, and that children use it to draw a smiling face.

6. What lesson did the four shapes learn by the end of the story? (0 Marks)
- They learnt that instead of fighting about who is best, they should work together, since each of them is special in their own way.
7. Name two colours mentioned or used in the story "Colours". (0 Marks)
- Any two colours such as red and blue, or any colours the children might use with their crayons.
8. Why do you think Badal's mother allowed him to keep the puppy? (0 Marks)
- She saw that Badal cared about the puppy and asked him to promise to take care of it, showing she trusted him to be responsible.
9. How would you describe Moti's character - brave, lazy, or caring? Explain with one reason. (0 Marks)
- Moti is caring and brave, because he waited loyally for Badal and helped find him when he was in danger, barking near the pit to guide help.
10. Why did Square think it was the best shape? (0 Marks)
- Square said it was the best because it had four equal sides, all the same size.
11. What can we learn from the way the shapes stopped fighting? (0 Marks)
- We learn that arguing over who is "the best" is not useful, and that everyone has their own special qualities worth appreciating.
12. Write one sentence describing what happens at the start of "Badal and Moti". (0 Marks)
- Badal lived happily with his mother in a village, and one evening on his way home from school, he found a shivering puppy.
13. Why might sharing crayons help the children in "Colours" make better pictures? (0 Marks)
- With more colours available between them, they can use a wider variety of shades to make their pictures more colourful and interesting.
14. What kind of story is "Best Friends" - about people, animals, or shapes? Explain. (0 Marks)
- "Best Friends" is a story about shapes - Circle, Square, Triangle, and Rectangle - who learn an important lesson about working together.

SECTION C — Short Answer Questions (Explain) (3 Marks each)

1. Explain in your own words what the story "Colours" teaches children about sharing. (0 Marks)
- The story shows two children who each have different crayon colours and cannot make a fully colourful picture alone.
 - When they decide to share their crayons with each other, both of them are able to create much better and more colourful drawings.
 - This teaches children that sharing with others can help everyone benefit more than keeping things only to themselves.
2. Describe the bond between Badal and Moti, using events from the story to support your answer. (0 Marks)
- Badal showed kindness by bringing home a shivering puppy and caring for it, which shows he has a kind heart.
 - As Moti grew up, the two became inseparable friends who ate and played together every day.
 - When Badal fell into a pit, Moti proved his loyalty by helping find him, showing that their friendship was built on real care for each other.
3. Why do you think each shape in "Best Friends" believed it was the best? Explain using at least two shapes' arguments. (0 Marks)
- Circle believed it was the best because it is round, has no sharp edges, and is used to draw smiling faces.
 - Square believed it was the best because it has four equal sides, giving it a sense of balance and fairness.
 - Each shape focused only on its own good qualities, without realising that every shape has something special about it.
4. What moral or lesson can we take from "Best Friends" and apply to our own friendships? (0 Marks)
- The story teaches us that fighting over who is "the best" often leads to unnecessary arguments.
 - Just like the shapes, friends should focus on what makes each person special instead of comparing themselves to each other.
 - Working together, like the shapes eventually did, leads to better and happier outcomes than constant competition.
5. Imagine you are Badal. Write two or three sentences about how you would have felt when you were stuck in the pit and heard Moti barking nearby. (0 Marks)
- I would have felt scared and worried while stuck in the pit, unsure if anyone would find me.
 - Hearing Moti bark nearby would have given me hope and relief, knowing that help was close.
 - I would have felt very grateful and happy once my mother and Moti finally found me.
6. Compare the stories "Colours" and "Best Friends" - what similar message do both stories share? (0 Marks)
- Both stories are about getting along with others rather than being selfish or competitive.
 - "Colours" shows the benefit of sharing, while "Best Friends" shows the benefit of cooperating instead of fighting.
 - In both cases, working together with others leads to a happier and better outcome than acting alone or arguing.

SECTION D — Long Answer Questions (5 Marks each)

1. Write a short paragraph in your own words describing the story of "Badal and Moti", including how it begins, what happens in the middle, and how it ends. (0 Marks)
- The story begins with a boy named Badal who lives happily with his mother in a village.
 - One evening, on his way home from school, Badal finds a shivering puppy and brings it home; he and his mother name the puppy Moti.
 - As time passes, Badal and Moti become the best of friends, doing everything together.
 - One rainy day, Badal slips and falls into a deep pit on his way home; when he does not return on time, his worried mother goes looking for him with Moti, who follows Badal's scent and barks near the pit to lead her to him, and Badal is safely found.

2. Retell the story of "Best Friends" in your own words, and explain what finally made the four shapes stop fighting. (0 Marks)

- The story is about four shapes - Circle, Square, Triangle, and Rectangle - who are good friends but one day begin to argue about who is the best shape.
- Each shape gives reasons why it believes it is better than the others, such as Circle's smooth roundness or Square's equal sides.
- Their argument continues until something (like a star, as mentioned in the story) helps them see things differently and realise that each shape is special in its own way.
- In the end, the four shapes decide to stop fighting and work together as friends again, understanding that being different does not mean one is better than the other.

3. Write about a time you shared something with a friend or family member, similar to the story "Colours". Explain what you shared and how it made you feel. (0 Marks)

- This is a personal, open-ended answer that students should write based on their own experience.
- A good answer describes what was shared (for example, a toy, food, or a book), who it was shared with, and why the decision to share was made.
- It should also explain how sharing made the student feel - for example, happy, proud, or closer to the person they shared with - similar to how sharing crayons helped the children in "Colours" make better pictures together.
