Class 3 English — CA-1 (Medium) — Answer Key

Class : 3

Subject : English (Santoor)

Max Marks : 70

Duration : 2 Hr 30 Min

Syllabus: Chapters 1–3 — Colours, Badal and Moti, Best Friends

General Instructions: All questions are compulsory. For Section A, write the correct option letter.

ANSWER KEY

SECTION A — Multiple Choice Questions (1 Mark each)

- What can we infer about the two children in "Colours" before they decided to share? (1 Mark)
 - They could each make fully colourful pictures alone
 - B. Each could only use their own limited set of crayons ✓**
 - They did not like drawing
 - They had no crayons at all
- What quality of Badal is shown when he brings the shivering puppy home? (1 Mark)
 - Carelessness
 - B. Kindness and compassion ✓**
 - Fear
 - Laziness
- What condition did Badal's mother set before allowing him to keep the puppy? (1 Mark)
 - He must sell it later
 - B. He must promise to take care of it ✓**
 - He must give it away in a week
 - She set no condition
- How does the story "Badal and Moti" show that animals can be loyal to humans? (1 Mark)
 - Moti runs away when Badal is in trouble
 - B. Moti helps find Badal when he is stuck in a pit ✓**
 - Moti ignores Badal completely
 - Moti is scared of Badal
- In "Best Friends", what mistake do the four shapes make at the start of their argument? (1 Mark)
 - They forget their own names
 - B. They focus only on their own good points and ignore others' ✓**
 - They stop talking to each other forever
 - They decide to become one shape
- Which shape claims to be the best because of its equal sides? (1 Mark)
 - Circle
 - B. Square ✓**
 - Cloud
 - Star
- What does the ending of "Best Friends" suggest about differences between people (or shapes)? (1 Mark)
 - Differences should cause permanent fights
 - B. Differences can be valued instead of causing conflict ✓**
 - Only one type should exist
 - Differences do not matter at all
- Which word best describes the change in the shapes' relationship by the end of the story? (1 Mark)
 - Broken
 - B. Reconciled (made up) ✓**
 - Unchanged
 - Worsened
- What is a common theme shared by both "Colours" and "Best Friends"? (1 Mark)
 - Both are about winning a race
 - B. Both are about cooperating instead of being selfish or competitive ✓**
 - Both are about travelling
 - Both are about cooking

SECTION B — Short Answer Questions (2 Marks each)

- Explain how the ending of "Colours" might have been different if the children had refused to share. (0 Marks)

► If the children had not shared, each would have been limited to their own smaller set of crayons and would likely have made less colourful, less interesting pictures than they did by sharing.
- What character traits does Badal show throughout the story "Badal and Moti"? Give examples. (0 Marks)

► Badal shows kindness by rescuing the shivering puppy, and responsibility by caring for Moti as he promised his mother, which are shown through his actions of feeding, playing, and looking after Moti.
- Why do you think the story specifically uses a dog (Moti) to show loyalty, rather than another animal? (0 Marks)

► Dogs are commonly known for being loyal and protective companions to humans, so using a dog helps readers easily understand and relate to the idea of loyalty in the story.

4. Explain the sequence of events that led to Badal being rescued from the pit. (0 Marks)
- Badal slipped and fell into a deep pit while walking home in the rain; when he did not return home on time, his worried mother went looking for him with Moti, who followed Badal's scent to the pit and barked to alert her, leading to his rescue.
5. How does the author use each shape's unique property (like round or equal-sided) to build their argument in "Best Friends"? (0 Marks)
- Each shape uses its own defining feature - like Circle's roundness or Square's equal sides - as "evidence" for why it is the best, showing how each shape is proud of what makes it unique.
6. What role does the star play in resolving the conflict in "Best Friends"? (0 Marks)
- The star helps the shapes see their argument differently, guiding them toward realising that fighting over who is best is not useful, which helps end their conflict.
7. Do you think the four shapes' friendship became stronger after their disagreement? Explain your answer. (0 Marks)
- Yes, their friendship likely became stronger, because working through a disagreement and understanding each other's value can help friends appreciate one another more than before.
8. Explain why sharing is described as a value worth learning at a young age, based on the story "Colours". (0 Marks)
- Learning to share early helps children build good relationships and understand that working together with others often brings better results than being selfish, a lesson useful throughout life.
9. What can readers learn about friendship from comparing Badal and Moti's relationship with the four shapes' relationship in "Best Friends"? (0 Marks)
- Both relationships show that true friendship involves caring for one another and working through problems together, whether that means physically helping a friend in danger (Moti) or resolving an argument peacefully (the shapes).
10. Why might the author have chosen a rainy day for Badal's accident in the story? (0 Marks)
- A rainy day makes the ground slippery and muddy, which makes it more believable that Badal would slip and fall, and it also adds to the sense of difficulty and danger in the story.
11. Explain the importance of promises in the story "Badal and Moti", using the mother's condition as an example. (0 Marks)
- Badal's mother asks him to promise to take care of the puppy before allowing him to keep it, showing that promises represent responsibility, and Badal keeping his promise builds trust between him and his mother.
12. How would the story "Best Friends" be different if only two shapes were arguing instead of four? (0 Marks)
- With only two shapes, the argument might be simpler and easier to resolve, while four shapes arguing shows a wider variety of viewpoints and makes the eventual lesson about cooperation feel more meaningful.
13. What does the phrase "best friends" mean to you, based on what you read in the chapter? (0 Marks)
- Best friends means people (or in this story, shapes) who care about, support, and value each other, even when they sometimes disagree, and who choose to stay close despite their differences.
14. Explain one way children can apply the lesson from "Colours" in their daily school life. (0 Marks)
- Children can apply this lesson by sharing stationery, books, or ideas with classmates, which helps everyone learn and enjoy activities better, just like the children in "Colours" made better pictures by sharing crayons.

SECTION C — Short Answer Questions (Explain) (3 Marks each)

1. Analyse how the story "Badal and Moti" builds up its emotional impact, from Badal finding the puppy to Moti helping rescue him. (0 Marks)
- The story starts on a gentle, caring note with Badal rescuing a shivering puppy, immediately showing his kind nature.
 - It then builds a warm picture of daily friendship between Badal and Moti, helping readers grow attached to their bond.
 - The tension rises when Badal falls into the pit and does not return home, creating worry, before Moti's loyal actions bring a relieving and emotional resolution.
 - This structure - kindness, friendship, danger, and rescue - makes the story's message about loyalty and love feel earned rather than sudden.
2. Explain how each shape's argument in "Best Friends" reveals something about their personality, not just their appearance. (0 Marks)
- Circle's focus on being smooth and used for smiling faces suggests a cheerful, friendly personality.
 - Square's pride in having equal sides suggests a sense of fairness and balance in its character.
 - Through these arguments, the story shows that physical shape and personality can be linked in a story, making each character feel distinct and relatable, not just a simple geometric shape.
3. Discuss what "Colours" teaches about cooperation being better than working alone, using specific reasoning from the story. (0 Marks)
- When each child has only their own crayons, their pictures are limited to fewer colours and possibilities.
 - By sharing, the combined set of crayons allows both children to create richer, more colourful, and more creative pictures than either could alone.
 - This shows that cooperation can lead to a better result for everyone involved, compared to each person working with only their own limited resources.
4. Evaluate whether the ending of "Best Friends" fully resolves the shapes' disagreement, or if some tension might remain. Explain your reasoning. (0 Marks)
- The story suggests the shapes make up and choose to work together after realising fighting was pointless.
 - However, since each shape still has its own unique qualities it is proud of, some healthy pride in their differences likely remains - which is not necessarily bad, as it shows they can appreciate their uniqueness without fighting about superiority.
 - Overall, the ending resolves the conflict in spirit, even if each shape naturally still sees value in what makes it special.

5. Discuss how the theme of loyalty in "Badal and Moti" might apply to human friendships as well as the human-animal bond shown in the story. (0 Marks)
- Moti's loyalty to Badal - staying close, waiting for him, and helping find him - mirrors how loyal human friends support each other in difficult times.
 - Just as Moti did not give up searching for Badal, true friends stay by each other's side and help out when someone is in trouble.
 - This shows that loyalty, whether between a human and an animal or between two people, is built through consistent care and support over time.
6. Compare and contrast the ways conflict is resolved in "Best Friends" (an argument between shapes) versus how a difficult situation is resolved in "Badal and Moti" (Badal being stuck in a pit). (0 Marks)
- In "Best Friends", the conflict is emotional and verbal - an argument about who is best - resolved through realisation and cooperation, possibly guided by the star.
 - In "Badal and Moti", the difficulty is physical and dangerous - Badal being trapped - resolved through loyal action, as Moti actively searches and barks to guide help.
 - Both stories show problems being solved through connection with others, whether through understanding (shapes) or through direct helpful action (Moti), highlighting different but equally important types of support in relationships.

SECTION D — Long Answer Questions (5 Marks each)

1. Write a detailed paragraph explaining what all three chapters (Colours, Badal and Moti, Best Friends) teach us about getting along with others, using specific examples from each story. (0 Marks)
- "Colours" teaches that sharing with others, like crayons, can lead to better results for everyone than keeping things only for oneself.
 - "Badal and Moti" teaches about loyalty and care, shown through Badal rescuing Moti and Moti later helping rescue Badal when he is in danger, proving that kindness is often returned.
 - "Best Friends" teaches that arguing over who is "the best" is not helpful, and that friends should value each other's differences and work together instead of competing.
 - Together, these three stories build a rounded lesson about kindness, loyalty, sharing, and cooperation - all important qualities for building strong friendships and relationships with others.
2. Imagine the four shapes from "Best Friends" meet Badal and Moti. Write a short imaginative story (5-6 sentences) about what they might learn from each other. (0 Marks)
- This is a creative, open-ended writing task; students should be assessed on originality, clarity, and connection to the themes of the two stories.
 - A strong answer might show the shapes learning about loyalty and care from Moti's example, while Badal might learn from the shapes about accepting differences and not comparing himself to others.
 - The story should reflect an understanding of both chapters' key lessons - cooperation/valuing differences (from Best Friends) and loyalty/kindness (from Badal and Moti) - blended together in an imaginative way.
3. Write about a disagreement you have had with a friend, similar to the shapes in "Best Friends", and explain how it was resolved (or how you think it should have been resolved). (0 Marks)
- This is a personal, open-ended answer based on the student's own experience.
 - A good answer should describe the disagreement clearly, how each side felt, and what eventually happened or should happen to resolve it.
 - The answer should connect back to the lesson from "Best Friends" - that cooperation and understanding each other's differences is more valuable than continuing to argue about who is right or best.
