Class 3 Maths — CA-1 (Medium)

Class : 3

Subject : Maths (Math-Mela)

Max Marks : 70

Duration : 2 Hr 30 Min

Syllabus: Chapters 1–3 — What's in a Name?, Toy Joy, Double Century

General Instructions: All questions are compulsory. For Section A, write the correct option letter.

SECTION A — Multiple Choice Questions (1 Mark each)

1. If you group 23 pebbles into groups of 5, how many full groups do you get and how many are left over? (1 Mark)

A. 4 groups, 3 left over

B. 5 groups, 0 left over

C. 4 groups, 5 left over

D. 3 groups, 8 left over

2. How many edges does a cube have? (1 Mark)

A. 6

B. 8

C. 12

D. 10

3. Which of these shapes can roll AND stack (has both flat and curved surfaces)? (1 Mark)

A. Sphere

B. Cylinder

C. Cube

D. Cuboid

4. A cuboid has how many rectangular faces in total? (1 Mark)

A. 4

B. 6

C. 8

D. 12

5. What is the value of the digit 9 in the number 198? (1 Mark)

A. 9

B. 90

C. 900

D. 19

6. Which number is exactly halfway between 100 and 200? (1 Mark)

A. 110

B. 125

C. 150

D. 175

7. If you write numbers from 190 to 200 in order, how many numbers will you write in total? (1 Mark)

A. 9

B. 10

C. 11

D. 12

8. Which of these is the correct expanded form of 163? (1 Mark)

A. $100 + 60 + 3$

B. $100 + 6 + 3$

C. $160 + 3 + 0$

D. $16 + 3$

9. Two shapes together make a toy train engine: a cuboid body and a cylinder chimney. Which property lets the chimney stand upright? (1 Mark)

A. Its flat circular base

B. Its curved surface only

C. It has no faces

D. It can roll easily

SECTION B — Short Answer Questions (2 Marks each)

1. A farmer keeps one small stone in a bag for every sheep that goes out to graze, and takes one stone out for every sheep that returns. How does this help the farmer? (0 Marks)

2. Explain why a cube is a special type of cuboid. (0 Marks)

3. Name two objects that combine more than one 3D shape, and describe the shapes used. (0 Marks)

4. Write the number that is 10 more than 175, and the number that is 10 less than 175. (0 Marks)

5. Compare 3-digit numbers 142 and 124 using $<$ or $>$ and explain how you decided. (0 Marks)

6. A box contains 100 pencils. If 37 pencils are taken out, how many are left in the box? (0 Marks)

7. Write any three numbers between 100 and 200 that have 5 in the tens place. (0 Marks)

8. Explain how counting in groups of 10 makes counting a large pile of buttons easier than counting one by one. (0 Marks)

9. Name a shape used for the wheels of a toy car and explain why that shape is chosen. (0 Marks)

10. If a cuboid box has a length longer than its height and width, how would it look different from a cube-shaped box? (0 Marks)
11. Write the smallest and largest 3-digit numbers you can make using the digits 1, 8, and 4 (using each digit once). (0 Marks)
12. A shopkeeper arranges 120 sweets into jars of 20 sweets each. How many jars are needed? (0 Marks)
13. How are a cone and a cylinder similar, and how are they different? (0 Marks)
14. Write in words: 200. (0 Marks)

SECTION C — Short Answer Questions (Explain) (3 Marks each)

1. A group of children want to count 156 marbles without losing track. Describe a step-by-step method they could use, connecting it to grouping in tens and hundreds. (0 Marks)
2. Explain how the properties of shapes (flat/curved surfaces, corners) help decide whether an object can roll, stack, or slide. (0 Marks)
3. Three numbers are given: 187, 178, 168. Write them in decreasing order and explain your method of comparing. (0 Marks)
4. Design a simple toy using at least three different 3D shapes. Describe which shapes you used and where. (0 Marks)
5. A basket has 200 apples. 45 are given away, and then 30 more are sold. How many apples remain? Show each step. (0 Marks)
6. Explain why understanding place value (ones, tens, hundreds) is important when comparing numbers like 199 and 200. (0 Marks)

SECTION D — Long Answer Questions (5 Marks each)

1. Explain, with examples, how the ideas in "What's in a Name?" (counting and tracking) connect to the ideas in "Double Century" (numbers up to 200) as a child learns to count larger and larger amounts. (0 Marks)
2. Using shapes learnt in "Toy Joy," design and describe (in words) a toy shop display that uses cubes, cuboids, cylinders, cones, and spheres, explaining why each shape suits its use. (0 Marks)
3. A shopkeeper starts the day with 200 toys. Throughout the day, 68 toys are sold in the morning and 47 more in the afternoon, but 15 toys are returned by customers in the evening. How many toys does the shopkeeper have at the end of the day? Show all your working step by step. (0 Marks)
