Class 4 EVS — CA-1 (Easy) — Answer Key

Class : 4

Subject : EVS (Our Wondrous World)

Max Marks : 70

Duration : 2 Hr 30 Min

Syllabus: Chapters 1–3 — Living Together, Exploring Our Neighbourhood, Nature Trail

General Instructions: All questions are compulsory. For Section A, write the correct option letter.

ANSWER KEY

SECTION A — Multiple Choice Questions (1 Mark each)

1. Why are humans described as "social beings"? (1 Mark)

- A. They live completely alone
- C. They avoid all other people

- B. They naturally live and work together in groups and communities ✓**
- D. They cannot form relationships

2. Which of these is an example of a community role that helps maintain social harmony? (1 Mark)

- A. Ignoring neighbours
- C. Refusing to help others

- B. A leader or elder helping resolve disagreements fairly ✓**
- D. Avoiding all community events

3. What does "exploring our neighbourhood" mainly involve? (1 Mark)

- A. Staying indoors all day
- C. Ignoring your surroundings

- B. Observing streets, buildings, parks, and other features nearby ✓**
- D. Only looking at maps online

4. Which of these is a type of transportation you might observe in your neighbourhood? (1 Mark)

- A. A bus ✓**
- C. A tree

- B. A cloud
- D. A river

5. What is a "nature trail"? (1 Mark)

- A. A busy shopping street
- C. A type of building

- B. A path through a natural area used to observe plants and animals ✓**
- D. A kind of vehicle

6. On a nature trail, what might you observe? (1 Mark)

- A. Trees, insects, and birds ✓**
- C. Only buildings

- B. Only cars
- D. Nothing at all

7. Why is it useful to map your neighbourhood? (1 Mark)

- A. Maps are not useful
- C. Maps only show oceans

- B. Maps help us understand and remember the layout of a place clearly ✓**
- D. Maps confuse people

8. Which of these is an example of a family structure? (1 Mark)

- A. A single-parent family ✓**
- C. A kind of vehicle

- B. A type of building
- D. A nature trail

9. Why might humans modify their environment, such as building roads or houses? (1 Mark)

- A. To harm nature
- C. For no reason at all

- B. To meet their needs, such as shelter and transportation ✓**
- D. Only to look nice

SECTION B — Short Answer Questions (2 Marks each)

1. Why is it important for a community to have people playing different roles (like teachers, shopkeepers, doctors)? (0 Marks)

- Different roles ensure that all the needs of a community - like education, food, and health - are taken care of, showing how people depend on each other.

2. Name two different types of family structures. (0 Marks)

- A nuclear family (parents and children) and a joint family (multiple generations living together) are two examples of family structures.

3. What kinds of buildings might you find while exploring your neighbourhood? (0 Marks)

- You might find homes, schools, shops, and hospitals while exploring your neighbourhood.

4. Why is observing your surroundings carefully an important skill? (0 Marks)

- Careful observation helps us notice details we might otherwise miss, building our understanding of our environment and how it works.

5. Name two ways humans have changed or modified their natural surroundings. (0 Marks)

- Humans have built roads and constructed buildings, both of which change the natural landscape to meet human needs.

6. What might you see or hear while walking along a nature trail? (0 Marks)
- You might see plants, insects, and birds, and hear sounds like birds chirping or leaves rustling in the wind.
7. Why is it important to be quiet and observant while on a nature trail? (0 Marks)
- Being quiet helps avoid disturbing animals, allowing you to observe their natural behaviour more closely and clearly.
8. How can different community members help each other during difficult times? (0 Marks)
- Community members can offer support, such as sharing food, helping with work, or providing comfort, showing how communities take care of one another.
9. Name two forms of transportation you might see in a busy neighbourhood. (0 Marks)
- Buses and bicycles are two common forms of transportation seen in busy neighbourhoods.
10. What is the difference between a "family" and a "community"? (0 Marks)
- A family is a small, close group of people usually related by birth or marriage, while a community is a larger group of people living in the same area, which may include many different families.
11. Why should we respect and take care of the plants and animals we observe on a nature trail? (0 Marks)
- Plants and animals are important parts of the natural environment, and respecting them helps preserve nature for others to enjoy and for the ecosystem to remain healthy.
12. What is one way that living in a community benefits an individual? (0 Marks)
- Living in a community provides support, friendship, and access to shared resources like schools and markets, which benefits individuals who might struggle alone.
13. Why might two different neighbourhoods look very different from each other? (0 Marks)
- Neighbourhoods can differ due to the types of buildings, population size, culture, or natural surroundings, making each neighbourhood unique.
14. Name one way you could help keep your neighbourhood clean and pleasant. (0 Marks)
- You could avoid littering and encourage others to dispose of waste properly to help keep the neighbourhood clean.

SECTION C — Short Answer Questions (Explain) (3 Marks each)

1. Explain why humans are considered social beings, using examples from daily life. (0 Marks)
- Humans naturally form families, friendships, and communities rather than living completely alone.
 - We depend on others for many things, such as teachers for education, farmers for food, and doctors for health care.
 - This natural tendency to live and cooperate with others in groups is why humans are described as social beings.
2. Describe the process you might follow to explore and map your neighbourhood. (0 Marks)
- First, you would walk around your neighbourhood, carefully observing important features like roads, buildings, and parks.
 - Next, you would note down or sketch the locations of these features relative to each other.
 - Finally, you could create a simple map showing the layout, which helps others understand and navigate the neighbourhood easily.
3. Explain why a nature trail can teach us more about the environment than simply reading about it in a book. (0 Marks)
- Walking a nature trail allows us to directly see, hear, and sometimes touch elements of nature, creating a real, memorable experience.
 - We can notice small details, like insect sounds or plant textures, that might not be fully captured in a book.
 - This hands-on experience often helps build a stronger, more personal connection to and understanding of nature compared to reading alone.
4. Describe how different types of families can still share the same values, even if their structures are different. (0 Marks)
- Whether a family is small (nuclear) or large (joint), most families share common values like love, support, and care for each other.
 - The specific structure of a family does not determine how strongly its members care for one another.
 - This shows that the type of family matters less than the relationships and values shared within it.
5. Explain why observing transportation and buildings in a neighbourhood can tell us about the lifestyle of people living there. (0 Marks)
- The types of buildings (such as many shops or mostly homes) can indicate whether an area is more residential or commercial.
 - The types of transportation used (such as many cars versus mostly bicycles) can hint at the wealth, density, or environmental habits of the community.
 - Together, these observations help us understand the daily life and needs of the people living in that neighbourhood.
6. Explain the importance of maintaining social harmony within a community, giving one example of how this might be achieved. (0 Marks)
- Social harmony ensures that people with different opinions or backgrounds can live together peacefully and cooperate for common benefit.
 - One example of achieving this is community leaders or elders helping resolve disagreements fairly, ensuring everyone feels heard and respected.
 - Without social harmony, communities might struggle with conflict, making it harder for people to support and help each other.

SECTION D — Long Answer Questions (5 Marks each)

1. Write a detailed description of your own neighbourhood, including the types of buildings, transportation, and community members you observe. Explain what this tells you about the people who live there. (0 Marks)

- This is a personal, open-ended answer based on the student's own neighbourhood.
- A good answer should describe specific features observed, such as types of buildings (homes, shops, schools), forms of transportation (cars, bicycles, buses), and any community members or roles noticed (shopkeepers, teachers, etc.).
- The answer should also reflect on what these observations suggest about the lifestyle, needs, or culture of the people living in that neighbourhood, connecting personal observation to the broader chapter theme.

2. Imagine you are going on a nature trail near your home or school. Describe what you might see, hear, and learn during this walk, and explain why this experience would be valuable. (0 Marks)

- This is a creative, open-ended answer; a strong response should describe realistic natural elements like trees, plants, insects, or birds that might be observed.
- It should also include sensory details, such as sounds (birds chirping, leaves rustling) or sights (colourful flowers, small animals).
- The response should explain why this experience is valuable - for example, building a connection to nature, learning about different species, or developing observation skills - connecting personal reflection to the chapter's themes.

3. Write about your own family and describe the roles different family members play in taking care of one another, connecting your answer to the idea of "Living Together". (0 Marks)

- This is a personal, open-ended answer based on the student's own family.
- A good answer should describe specific family members and the roles they play, such as parents providing care and guidance, or siblings supporting each other.
- The answer should connect these personal observations to the broader idea from "Living Together" - that humans are social beings who depend on and support one another within their families and communities.
