CA-1 — ANSWER KEY

Class : V

Max Marks : 70

Subject : Mathematics

Duration : 2 Hr 30 Min

Syllabus: We the Travellers–I • Fractions • Angles as Turns

General Instructions: All questions are compulsory. Read each question carefully before answering.

Section A — 1 Mark Each

1. Write in figures: Thirteen thousand five hundred twenty.

Ans: 13,520

2. Write 8,045 in words.

Ans: Eight thousand forty-five

3. Round off 4,017 to the nearest ten.

Ans: 4,020

4. Round off 5,789 to the nearest hundred.

Ans: 5,800

5. Which is greater: 40,347 or 34,740?

Ans: 40,347

6. Which fraction is equivalent to $\frac{1}{2}$? (a) $\frac{2}{4}$ (b) $\frac{2}{3}$ (c) $\frac{3}{5}$ (d) $\frac{1}{3}$

Ans: (a) $\frac{2}{4}$

7. Fill in the blank: $\frac{1}{3} = \frac{\quad}{6}$

Ans: $\frac{2}{6}$

8. Compare using > or <: $\frac{3}{4}$ ____ $\frac{1}{4}$

Ans: $\frac{3}{4} > \frac{1}{4}$

Section B — 2 Marks Each

9. Write the number 10,458 in expanded form.

Ans: $10,000 + 400 + 50 + 8$

10. Arrange in increasing order: 5,789 3,176 8,203 4,017

Ans: $3,176 < 4,017 < 5,789 < 8,203$

11. Find the nearest thousand of 2,346.

Ans: 2,000

12. Write any two fractions equivalent to $\frac{1}{4}$.

Ans: $\frac{2}{8}$ and $\frac{3}{12}$ (any correct pair)

13. Compare $\frac{5}{8}$ and $\frac{3}{8}$ using $<$ or $>$.

Ans: $\frac{5}{8} > \frac{3}{8}$

14. Which is bigger, $\frac{2}{5}$ or $\frac{2}{7}$? Give a reason.

Ans: $\frac{2}{5}$ is bigger — same numerator, smaller denominator means bigger fraction

15. How many $\frac{1}{8}$ turns make a half turn?

Ans: 4

16. What angle do you get after 2 quarter turns in the same direction?

Ans: Straight angle (half turn)

17. An angle formed after less than a quarter turn is called a(n) _____ angle.

Ans: Acute

18. If the minute hand moves 15 minutes, what fraction of a full turn has it made?

Ans: $\frac{1}{4}$ turn

19. Write the number name of 45,867.

Ans: Forty-five thousand eight hundred sixty-seven

20. Find the sum: $\frac{1}{3} + \frac{1}{3}$

Ans: $\frac{2}{3}$

21. Convert $\frac{9}{4}$ into a mixed number.

Ans: $2 \frac{1}{4}$

22. Fill in the box: $\frac{3}{5} = \frac{\quad}{10}$

Ans: 6

Section C — 3 Marks Each

23. A cyclist covers 15 km in one hour. How far will she travel in 4 hours at the same speed?

Ans: $15 \times 4 = 60$ km

24. Write any 3 numbers that lie between 38,125 and 38,600.

Ans: e.g. 38,200; 38,300; 38,400 (any 3 valid numbers)

25. A strip is divided into 9 equal parts. How many parts must be shaded to show $\frac{1}{3}$ of the strip? Write the equivalent fraction.

Ans: 3 parts shaded; $\frac{3}{9} = \frac{1}{3}$

26. Starting from North, a child makes 2 right angles turning clockwise. Which direction does she face now?

Ans: South (2 right angles = half turn)

27. Sevi ate $\frac{4}{6}$ of a paratha and Shami ate $\frac{4}{5}$ of an identical paratha. Who ate more? Give a reason.

Ans: Shami ate more — same numerator, smaller denominator ($5 < 6$) means $\frac{4}{5} > \frac{4}{6}$

28. A paper fan makes a $\frac{3}{4}$ turn. Is the angle formed acute, right, obtuse, or straight? Explain briefly.

Ans: It is more than a straight angle, since $\frac{3}{4}$ turn is more than a $\frac{1}{2}$ (straight angle) turn

Section D — 4 Marks Each (Word / Application Problems)

29. A school has 461 girls and 439 boys going on a trip. A Tempo Traveller carries 10 people. How many Tempo Travellers are needed for the whole school, and are all seats filled?

Ans: Total students = $461+439 = 900$; $900/10 = 90$ Tempo Travellers; all seats exactly filled

30. Raman ate 6 pieces of $\frac{1}{2}$ paratha, Dadaji ate 7 pieces of $\frac{1}{2}$ paratha, and Baba ate 5 pieces of $\frac{1}{2}$ paratha. Find how many whole parathas each of them ate, and the total eaten by all three.

Ans: Raman = $6/2 = 3$; Dadaji = $7/2 = 3 \frac{1}{2}$; Baba = $5/2 = 2 \frac{1}{2}$; Total = $18/2 = 9$ parathas

Section E — 2 Marks Each (From Your Textbook)

31. Swap the digits 7 and 4 in the number 1,478 to write a new number.

Ans: 1,748

32. How many notes of Rs 10 are there in Rs 7,934?

Ans: 793

33. Make a whole using 1 piece of $\frac{1}{2}$ and 2 pieces of $\frac{1}{4}$. Write this as an addition of fractions equal to 1.

Ans: $\frac{1}{2} + \frac{1}{4} + \frac{1}{4} = 1$

34. Starting from North, take two right angles turning clockwise. Which direction do you end up facing?

Ans: South
